The foregoing table shall serve as a **general guide** for establishing an ERT for commercial uses. When other data is available to determine actual flows, the District will analyze such information and establish an ERT which accurately represents the anticipated flows for a particular use. The flow and concentration values for such analysis are to be measured or determined based on the average for the peak month during a calendar year. Any type of use not specifically listed shall not be permitted unless authorized by the District following a review of all pertinent information.

When determining the ERT number for any use, the following general guidelines will apply:

1. All persons desiring to obtain or required to obtain sewage treatment from the District shall make application for service on forms provided by the District. Failure to accurately describe the proposed use or furnish any requested information shall be cause for denial or suspension of service.
2. All users shall be charged a minimum of 1 ERT.
3. Seasonal use rates, for commercial establishments only, may be permitted by the District when non-use exceeds three months.
4. Whenever interpretation of the above table or data provided by an applicant for service could result in different ERTs, the higher ERT shall be charged.
5. **All customers receiving service from the District agree upon request to furnish copies of monthly water bills to confirm usage.**
